

Run a Smarter Distribution Business with Odoo ERP

One platform for inventory, purchasing, warehouses, sales, fulfillment, and finance.

Managing growing order volumes, multiple warehouses, supplier relationships, and increasingly complex customer requirements?

Navabrind IT Solutions helps wholesale and distribution companies replace disconnected systems and manual processes with a fully integrated **Odoo ERP** environment built around the way distributors operate.

Analytics

Streamline Operations

End-to-end automation across your distribution business.

Real-time Visibility

Make faster, data-driven decisions with complete operational visibility.

Grow Profitably

Reduce costs, improve fulfillment, and delight your customers.

Transform Your Distribution Operations

Inventory & Multi-Warehouse Management

Get real-time visibility across warehouses and distribution centers. Automate replenishment, internal transfers, and stock reservations. Use barcode-driven receiving, picking, packing, and shipping.

Smarter Purchasing & Supplier Management

Automate purchasing based on replenishment requirements, centralize vendor information, track supplier pricing and lead times, and access better vendor performance insights.

Faster Sales & Order Fulfillment

Connect quotations, customer-specific pricing, sales orders, inventory and fulfillment. Automate the journey from order receipt to stock reservation, picking, shipping and invoicing.

Connected Supply Chain & Logistics

Gain end-to-end visibility across suppliers, warehouses, 3PL partners and customers. Integrate logistics and e-commerce systems. Maintain a unified view of stock and order movement.

Demand Forecasting & Replenishment

Use historical sales and demand data to plan purchasing and inventory more effectively, helping reduce stockouts, excess stock and unnecessary carrying costs.

One Connected Distribution Workflow

Real-time inventory and business data at every stage.

Why Navabrind IT Solutions?

Distribution Expertise

We understand multi-warehouse inventory, procurement, fulfillment, complex pricing, and the operational needs of wholesale distributors.

Odoo Expertise

Our teams configure and customize Odoo around your processes instead of forcing your operations into a generic ERP workflow.

Complex Integrations

Connect Odoo with 3PL providers, e-commerce platforms, marketplaces, accounting apps, and other business systems.

Built for Multi-Location Growth

Configure Odoo for multiple warehouses, sales channels and locations as your distribution network expands.

Implementation to Ongoing Support

From consulting and process mapping to implementation, data migration, customization, integration, training and support—work with one Odoo partner throughout your ERP journey.

Ready to Modernize Your Distribution Operations?

See how Odoo can be configured around your warehouses, purchasing, sales, and fulfillment processes.
